Relevant Experience for Software Development

Contract Software Engineer

Lambda School, New York, NY | Feb 2019 - Present

- Current Project: Financial Calculator | An all in one React.js financial calculator web application utilizing React-Hooks, React Class Components, and Semantic-UI for styling. I have constructed high order functions for forms and inputs, which will make for scaling the application more efficient as functionality continues to build out.
- Learned Facebook Messenger codebase during a two week iteration to produce a demo that was presented to Marc Randolph, founder of Netflix
- Created a chat bot, a persistent menu, and links to Amazon bookstore
- Built scrapers utilizing Nightmare and Cheerio to gather dummy content for application and pass through the Node.js back-end
- Designed and executed using dbdiagram.io for DB design visualization, then knex migrations, and PostgreSQL for implementation
- Back-end and all environmental variables were deployed using Heroku
- Contributed to a dietary application: Back-end routes in Express.js for AWS post requests, front-end React.js components and Redux state management, with styled components
- Worked with Restful API's that we built in our Node.js back-end and other specialized companies that provided aggregate nutritional data
- Built a news application using Restful API's and web scrapers to extract content from multiple news sites

Web Designer

Anaheim Automation, Anaheim, CA | Nov 2009 - July 2013

- Revamped entire website providing it with a fresh new professional look highlighting precision and quality. This all included user guides, specification sheets, photos, data verification using vendor and internal data
- Launched design and implementation of photo room for high-quality photography heavily utilizing photoshop for lighting effects, blemish removal and image sizing
- Generated new website marketing consisting of product pairing, shopping cart, SEO optimization, ad placements, and product specific websites

Education

Lambda School | Feb 2019

CSUF | Mihaylo College of Business and Economics | May 2017
